

PARCEL NUMBERS AND ACREAGES
The number and acreage of each parcel of land is shown within the parcel. It is important when identifying a parcel to specify the number(s) of the plan(s) on which it falls.
IN PARCELS DIVIDED BY THE SHEET EDGE, THE ACREAGES ARE SHOWN TO SHEET EDGE ONLY.

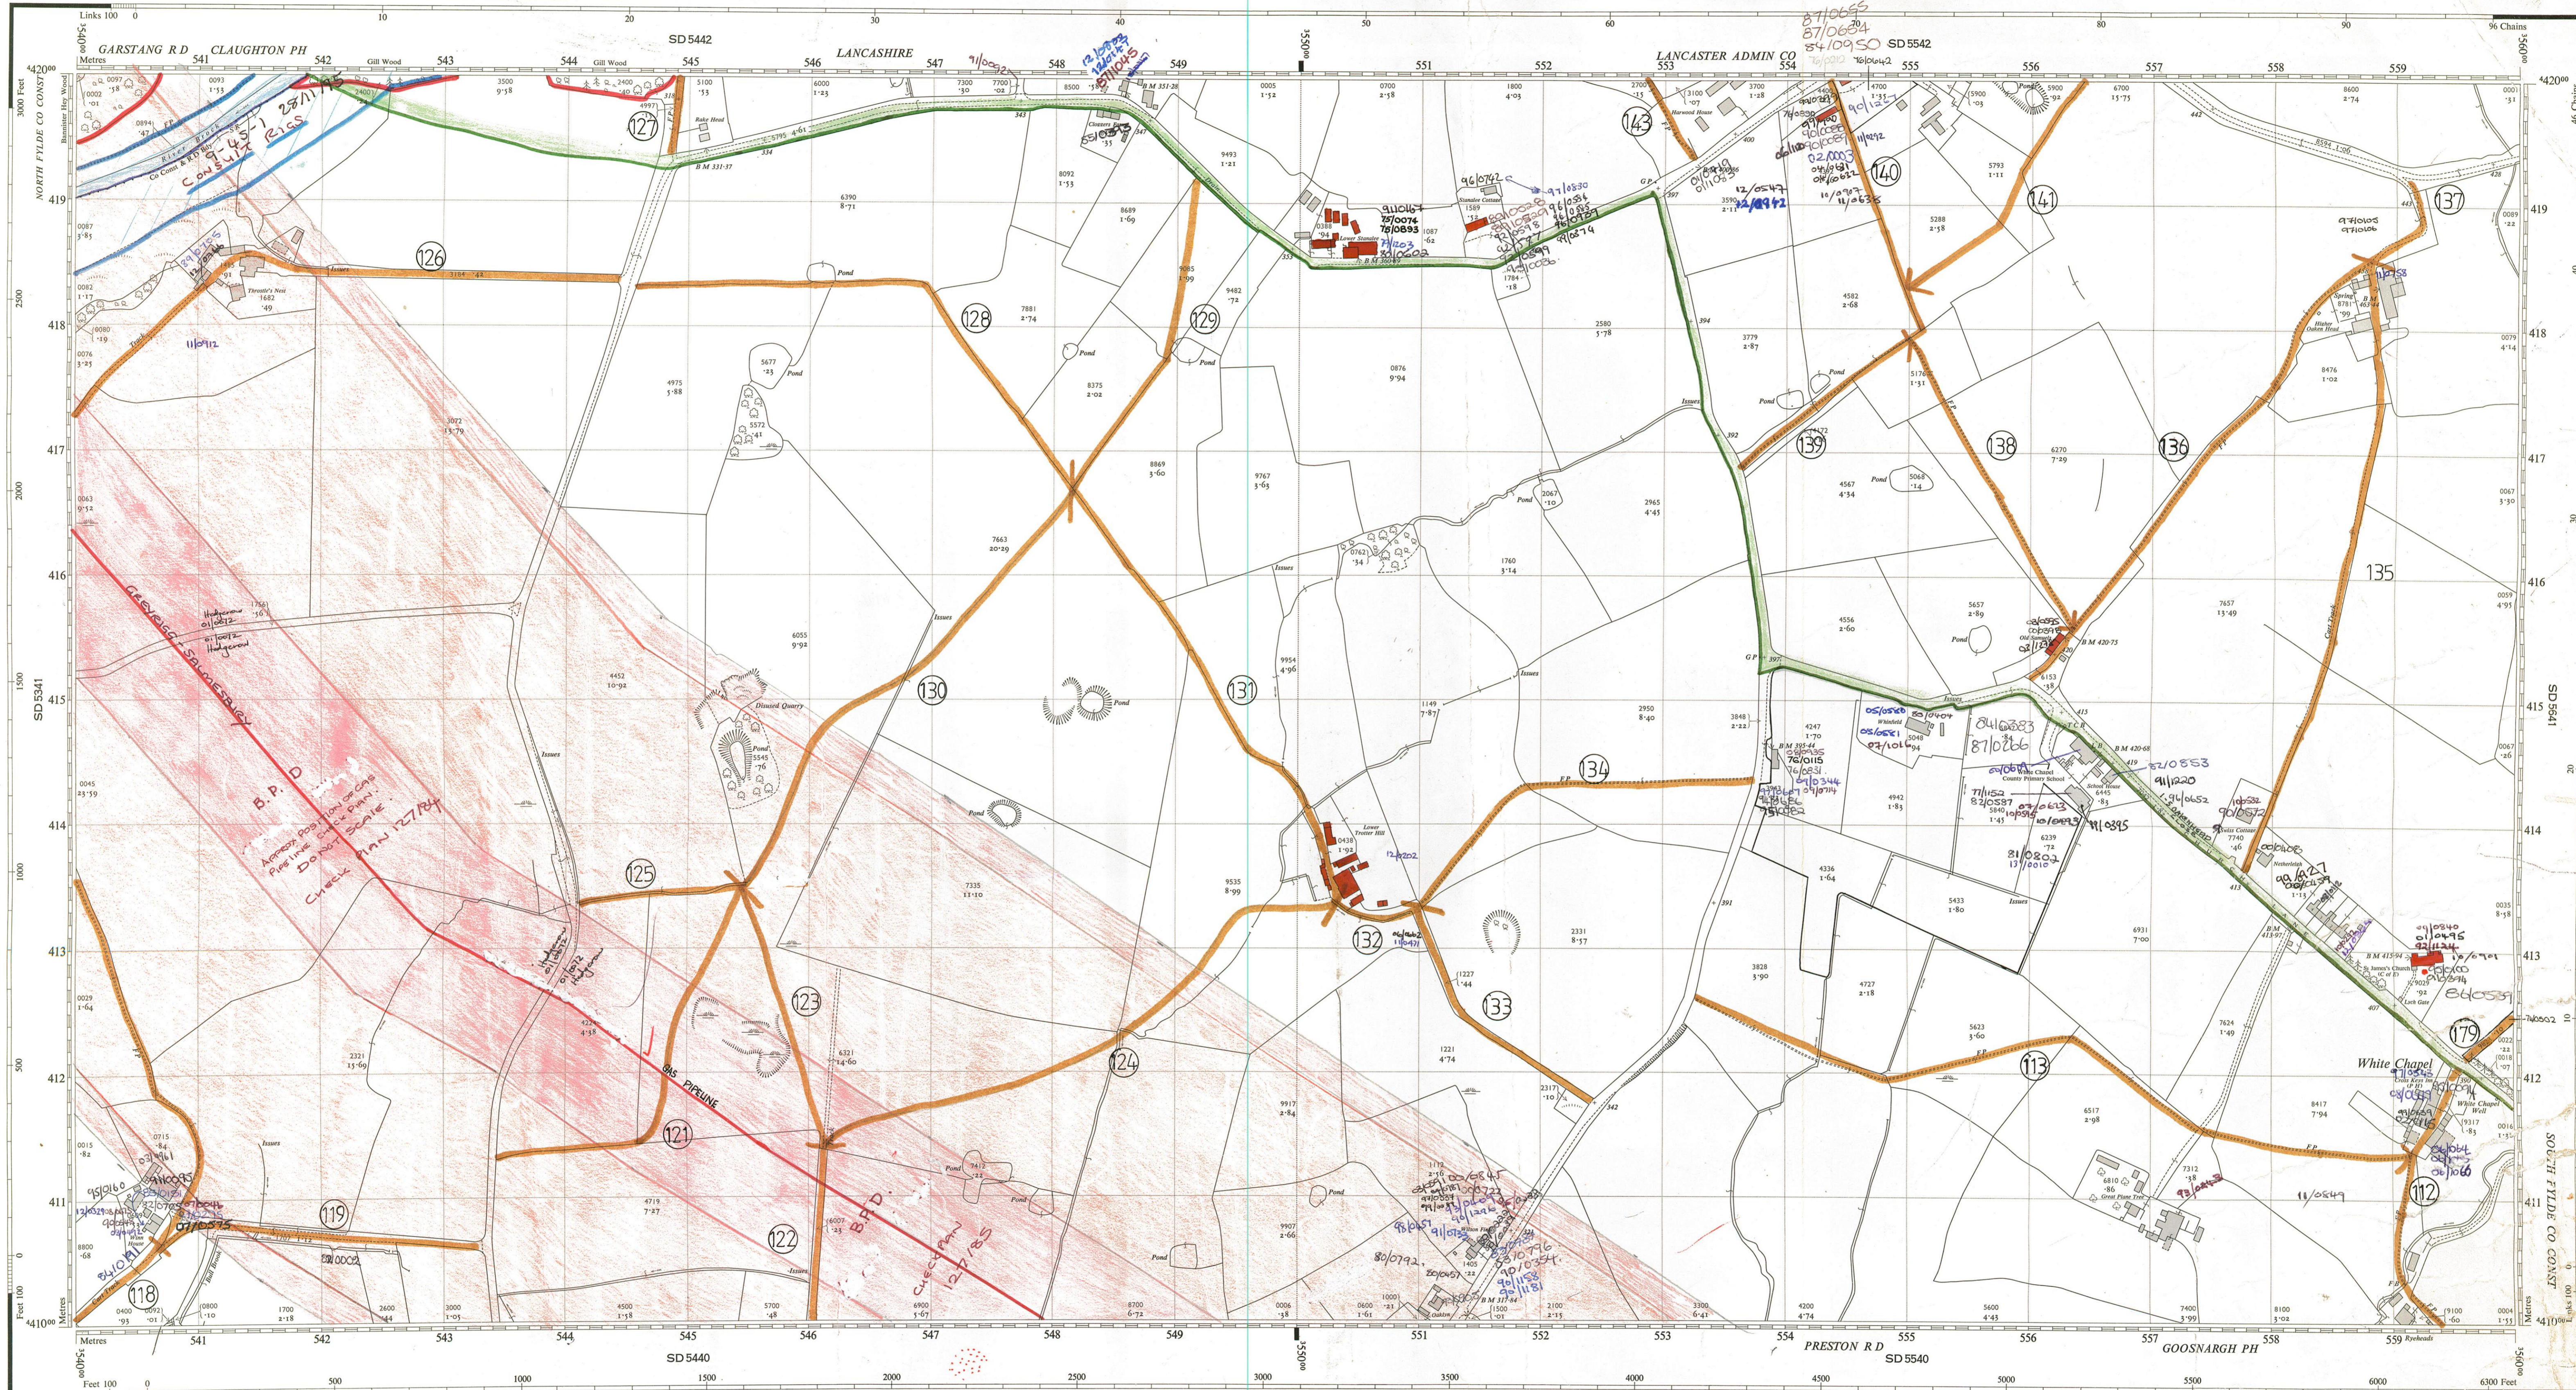

Revised March 1960
Levelled 1952

ORDNANCE SURVEY

Scale: 1:2500 or 25.344 inches to 1 Mile

Revised March 1960
Levelled 1952

The West half of this sheet is Plan SD 5441
The East half of this sheet is Plan SD 5541

Made and published by the Director General of the Ordnance Survey, Chessington, Surrey, 1961.
Reconstituted from former County Survey plans. Revised 1960.

REFERENCE
For fuller information see Reference Card published separately.

NATIONAL GRID REFERENCE
The lines on the plan form part of the National Grid and are spaced at 100 metre intervals.
To give a large scale reference defining the position of a point to the nearest 10 metres proceed as follows:—

EXAMPLE: W in Wilson Fields

| EASTING | NORTHING |
|---|--|
| Take west edge of square in which point lies and read the figures opposite this line on NORTH and SOUTH margins | Take south edge of square in which point lies and read the figures opposite this line on EAST and WEST margins |
| Estimate tens of metres from the grid line | Estimate tens of metres from the grid line |
| 551 | 410 |
| 2 | 5 |
| 5513 | 4105 |

TEN METRE REFERENCE: SD 55134107

For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System".
The representation on this plan of a road, track or footpath is no evidence of the existence of a right of way.
A square such as this plan represents 1/16 of an acre on the ground.
The altitudes of benches where shown is approximate.
