CONVERSION SCALE: Metres-Feet

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

Levelled 1961
 Boundaries Dec 1972

(a) Surveyed
 (b) Revised

SYMBOLS

- Site of antiquity
- Change of boundary mering
- Culverts
- Direction of water flow
- Electricity pylon
- Electricity Transmission Line
- Triangulation station
- Traverse station (permanent)
- Bench mark
- Surface level
- Revision point
- Revision point & bench mark coincident

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

- Take the two letters preceding the sheet number... TQ
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (distance e)... 058
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (distance n)... 291
- The full ten metre reference is given by writing first the letters followed by the Easting and then by the Northing... TQ 0582916

BOUNDARY MERINGS

- | | | |
|---------------------------------|-----------------------------|--------------------------|
| B.B. Base of Bank | C.S. Centre of Stream, etc. | S.R. Side of River, etc. |
| C.B. Centre of Bank | Def. Defaced | T.B. Top of Bank |
| C.C.S. Centre of Covered Stream | E.K. Edge of Kerb | Tk.H. Track of Hedge |
| C.D. Centre of Drain, etc. | F.F.W. Face of Fence, Wall | Tk.S. Track of Stream |
| C.R. Centre of Road, etc. | R.H. Root of Hedge | Und. Undefined |

COMPILED DATA

Levelled 1961

Boundaries Dec 1972

(a) Oct 1956

(b) Dec 1972

HEIGHTS are given in METRES above the Newlyn Datum.

Bench marks, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

Made and published by the Director General of the Ordnance Survey

- NATIONAL GRID REFERENCE
- The grid lines form part of the National Grid and are 1:20 metres apart, defining the position of a point to within 10 metres in each direction.
- Take the two letters preceding the sheet number.
 - Take the west edge of the grid square in which the point is situated, read the figures opposite this line on the north side of the map. Estimate tens of metres from the grid line to the point.
 - Take the south edge of the grid square in which the point is situated, read the figures opposite this line on the east side of the map. Estimate tens of metres from the grid line to the point.
 - Then, if from map reference is given by the Ordnance Survey, follow it by the Easting and Northing.
- For further information see Appendix 1 to the National Reference System.

The alignment of tunnels where shown is approximate

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.
