

COMPILATION DATA

(a) Nov 1957
(b) May 1985

Levelled 1980
Boundaries Sep 1985

Heights are given in metres above the Newlyn Datum

Bench mark lists which may contain later levelling information, also particulars of bench marks to which no values have been shown, are obtainable from the Ordnance Survey, Southampton

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

Made and published by the Ordnance Survey, Southampton.

Ward	Ward	Ward	Ward
Constituency (County, Borough or European Assembly)	Constituency (County, Borough or European Assembly)	Constituency (County, Borough or European Assembly)	Constituency (County, Borough or European Assembly)

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:-

- Take the two letters preceding the sheet number..... TO 058
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin..... 058
- Estimate tens of metres from the grid line to the point (distance e)..... 8
- The resulting four figure number is the Easting..... 0588
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin..... 281
- Estimate tens of metres from the grid line to the point (distance n)..... 8
- The resulting four figure number is the Northing..... 2818

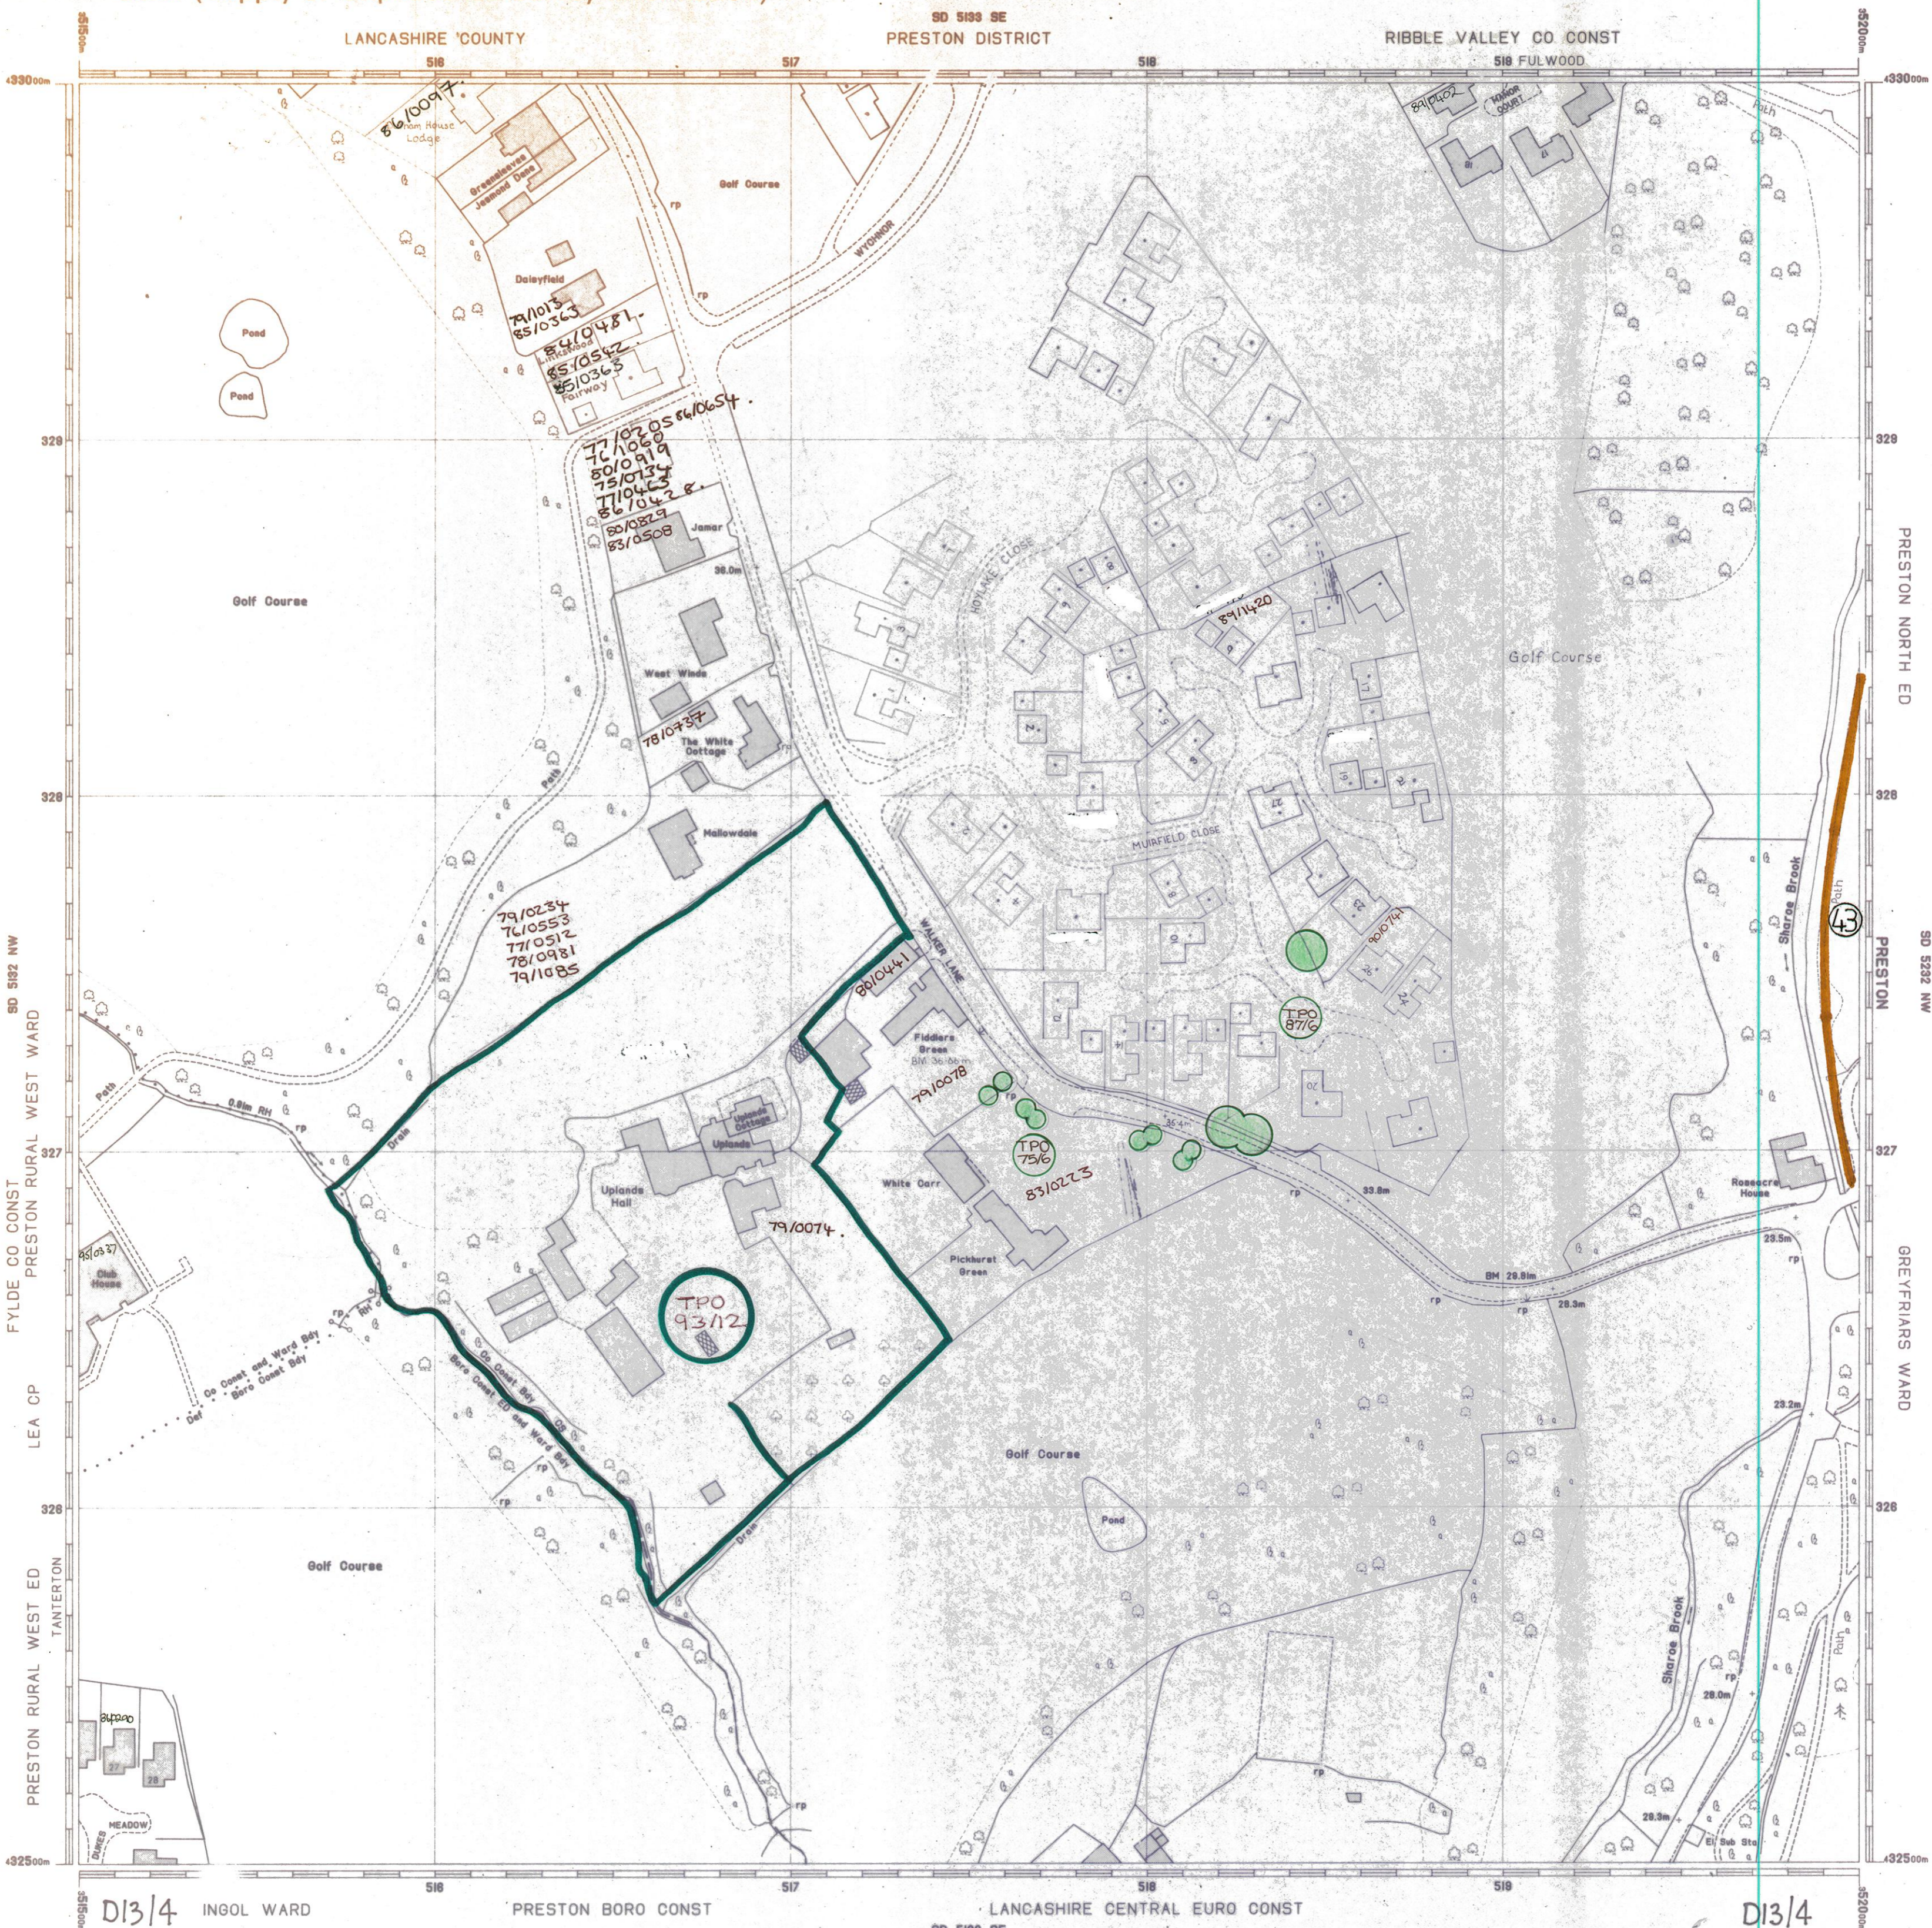

The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing..... TO 05882818

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'

One grid square on this plan represents one hectare on the ground.

To convert hectares to acres multiply by 2.47105
