COMPILATION DATA

Levelled 1960
Boundaries Apr 1980

(a) Feb 1980 (b) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the N_{2000} Datum. Bench mark lists, which may contain later levelling information, particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey. The representation on this plan of a road track or path is no evidence of the existence of a right of way. The alignment of tunnels where shown is approximate.

Details of symbols and abbreviations used can be obtained from Ordnance Survey, Southampton.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals defining the position of a point to within 10 metres proceed as follows:

- 1 Take the two letters preceding the sheet number
- 2 Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (Distance x). The resulting four figure number is the Easting.
- 3 Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (Distance y). The resulting four figure number is the Northing.
- 4 The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing.
