LEVELLED
Boundaries
Oct 1975(a) Surveyed. (b) Revised.
Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.Heights are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

Details of symbols and abbreviations used can be obtained from Ordnance Survey, Southampton.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

- Take the two letters preceding the sheet number TO
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin 058
- The resulting four figure number is the Northing 0588
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin 291
- Estimate tens of metres from the grid line to the point (distance e) 6
- The resulting four figure number is the Easting 2916
- The full ten figure reference is given by writing first the letters, followed by the Easting and then by the Northing TO 05882916

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.

One grid square on this plan represents one hectare on the ground.

To convert hectares to acres multiply by 2.47105.
