

COMPILATION DATA
 (a) Surveyed..... 1981
 (b) Revised..... Jan 1985

Levelled..... 1981
 Boundaries..... Jan 1985

Reprinted with metric values and revised boundaries

Heights are given in metres above the Newlyn Datum.
 Bench mark lists which may contain later levelling information, also particulars of bench marks to which no values have been shown, are obtainable from the Ordnance Survey, Southampton.
 The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
 The alignment of tunnels where shown is approximate.

Made and published by the Ordnance Survey, Southampton.
 A © Crown copyright 1988
 Reproduction in whole or in part by any means is prohibited without the prior permission of the Ordnance Survey.

BOUNDARY MERINGS

BB.....	Base of Bank	FF.....	Face of Fence
OB.....	Centre of Bank	FW.....	Face of Wall
OSB.....	Centre of Overlaid Stream	RW.....	Roof of Hedge
OD.....	Centre of Drain, etc.	SR.....	Side of River, etc.
OR.....	Centre of Road, etc.	TB.....	Top of Bank
OS.....	Centre of Stream, etc.	TH.....	Track of Hedge
Def.....	Defaced	TS.....	Track of Stream
EX.....	Edge of Kerb	Und.....	Undefined

Imperial equivalents for metric boundary merings
 0.91m = 3ft 1.22m = 4ft

BOUNDARIES

ENGLAND AND WALES		SCOTLAND	
County	Region or Islands Area	County	District
District	Not shown	District	Not shown
London Borough	Not shown	Not shown	Not shown
Civil Parish (England)	Not shown	Not shown	Not shown
Community (Wales)	Not shown	Not shown	Not shown
Electoral Division	Not shown	Electoral Division	Not shown
Ward	Not shown	Ward	Not shown
Constituency (County, Borough or European Assembly)	Not shown	Constituency (County, Borough or European Assembly)	Not shown

ED Bdy
 Ward Bdy

Boro Const Bdy
 Euro Const Bdy

Burgh Const Bdy
 Co Const Bdy

Coincident boundaries are shown by the first appropriate symbol above, e.g., Boro Const and ED Bdy.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:-

EXAMPLE from sheet TO 0529 SE

- Take the two letters preceding the sheet number..... TO 058
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin..... 058
 Estimate tens of metres from the grid line to the point (distance x)..... 8
 The resulting four figure number is the Easting..... 0588
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin..... 291
 Estimate tens of metres from the grid line to the point (distance y)..... 8
 The resulting four figure number is the Northing..... 2918 058
- The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing..... TO 05882918

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.

One grid square on this plan represents one hectare on the ground.
 To convert hectares to acres multiply by 2.47105

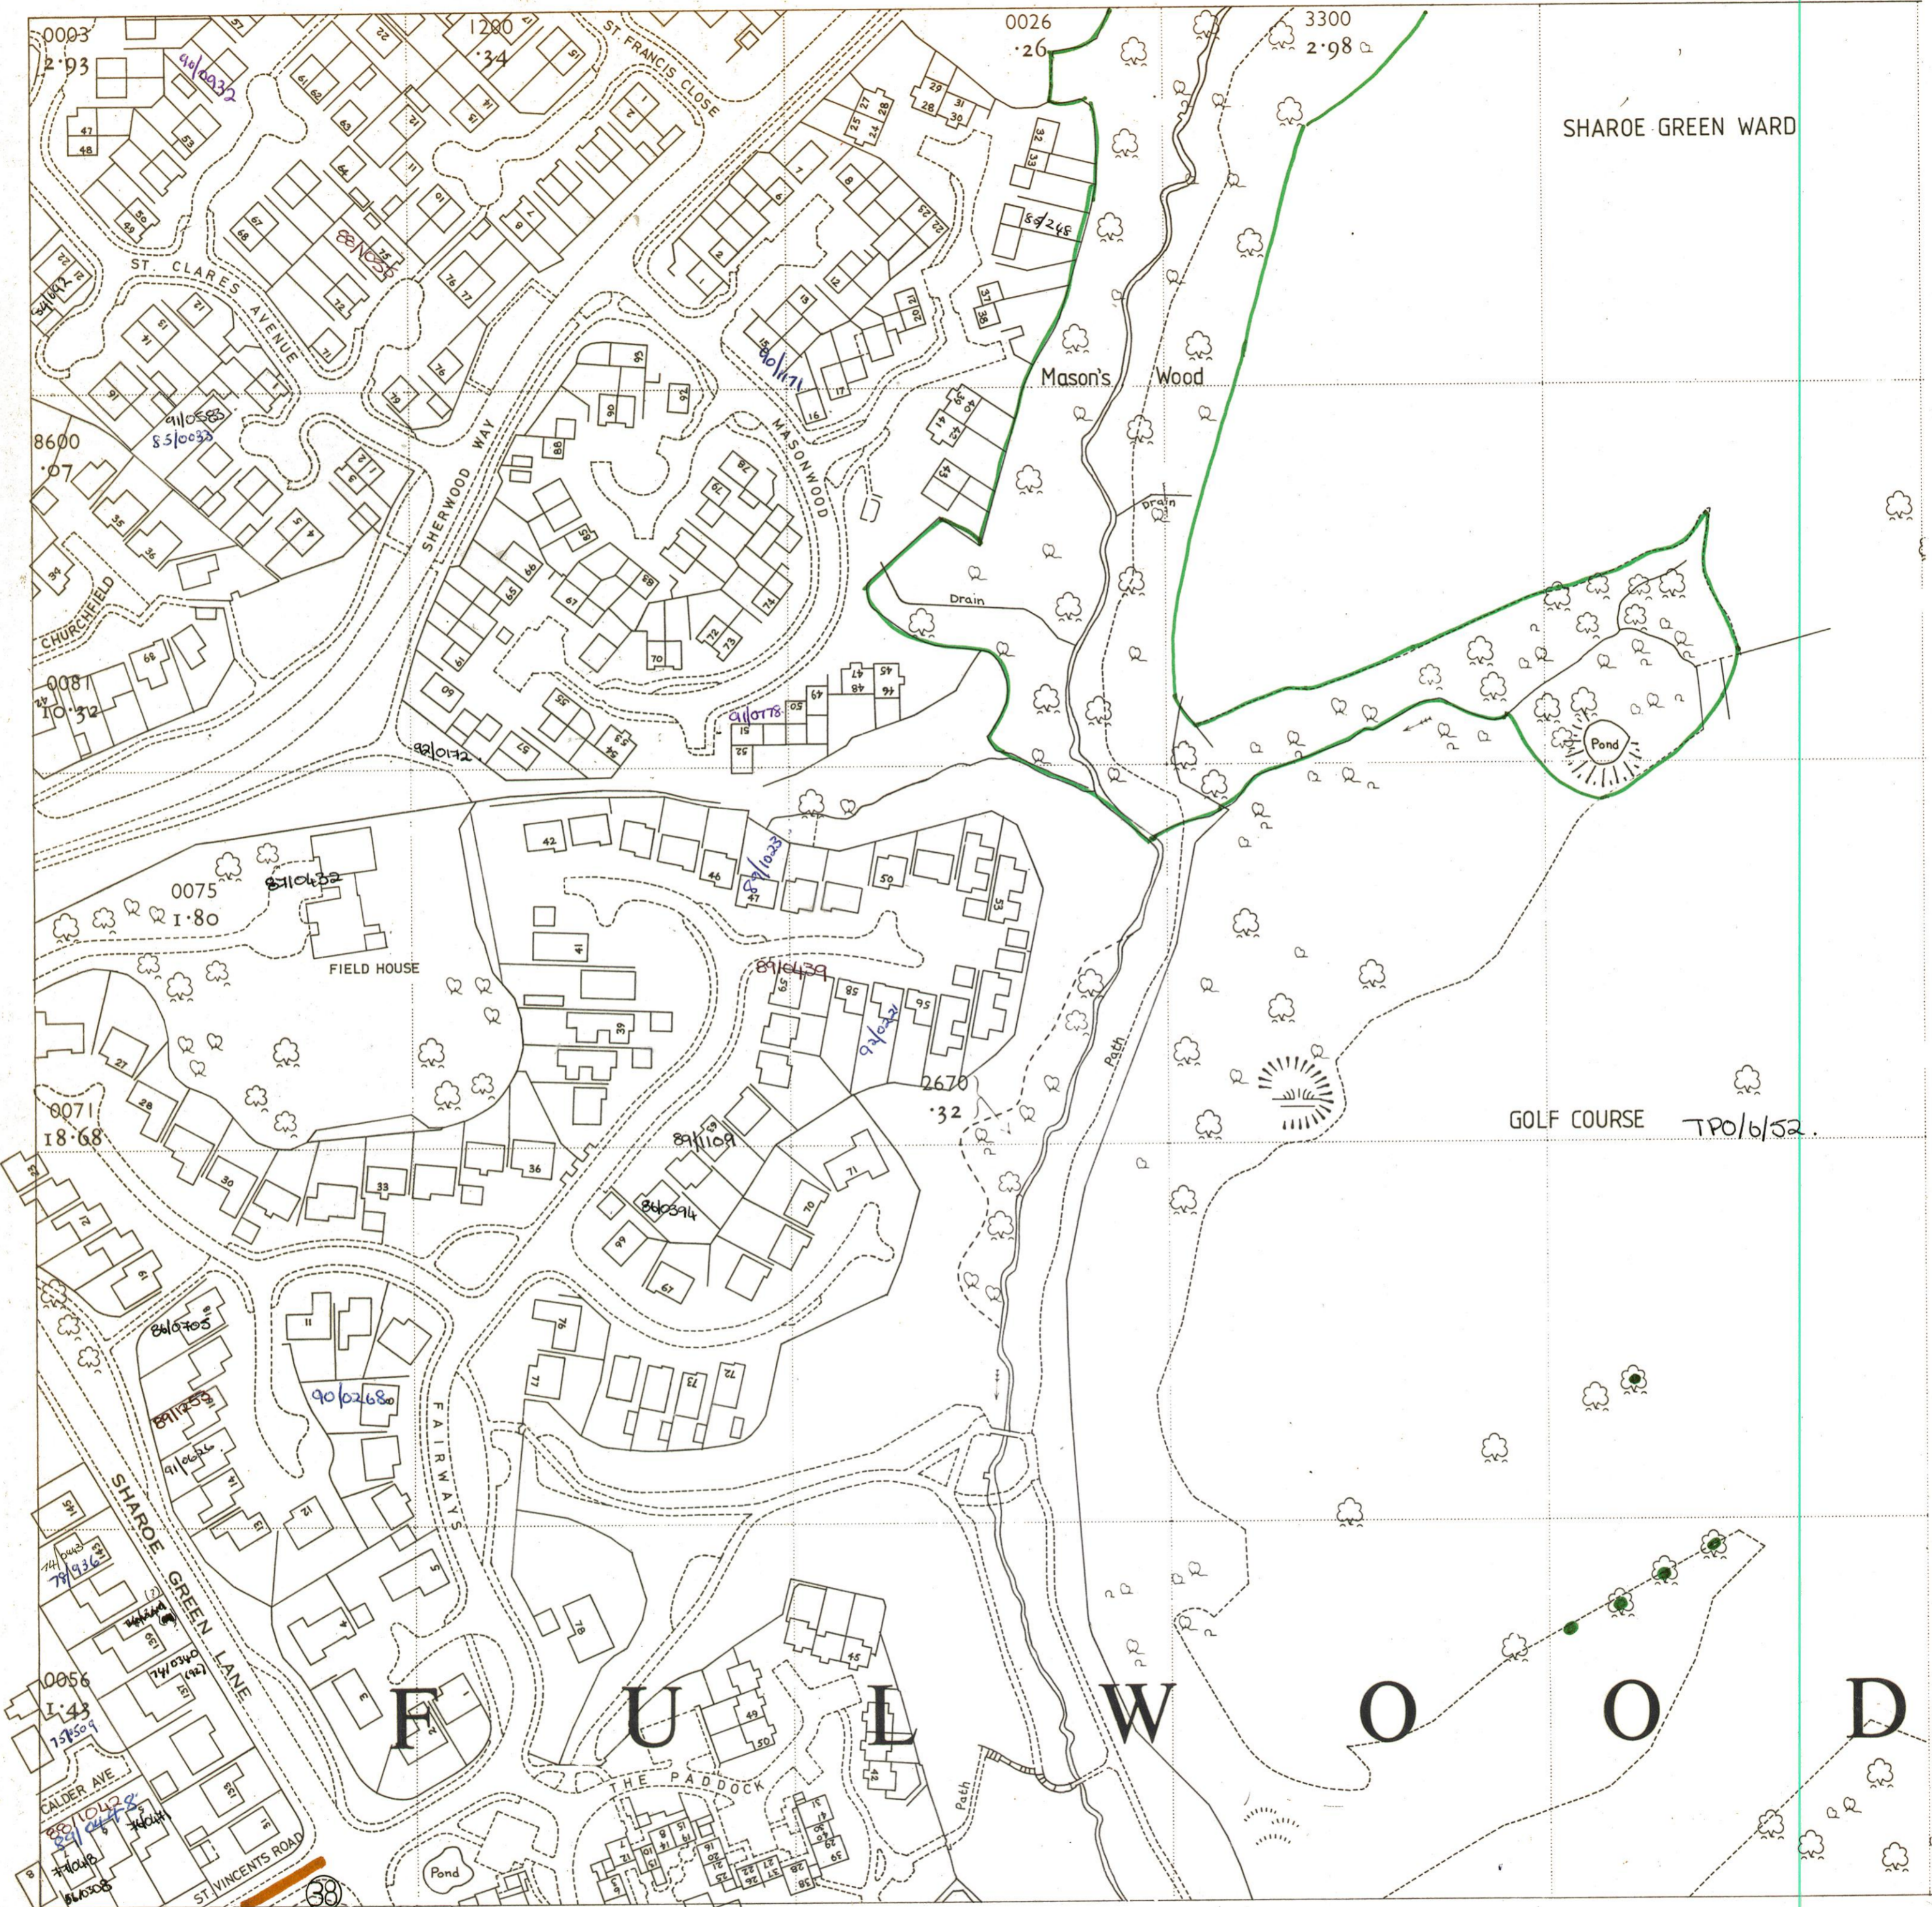

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Ordnance Survey, Southampton or to the local Ordnance Survey office.

Digital data for this map and others at 1:250, 1:2500 and 1:10000 scales is available on magnetic tape from the Ordnance Survey.

Details of symbols and abbreviations used can be obtained from the Ordnance Survey, Southampton.
