CONVERSION SCALE: Metres-Feet

Made and published by the Director General of the Ordnance Survey, Southampton

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows -

- Take the two letters preceding the sheet number. **EXAMPLE** from sheet TQ 0582: **TQ**
 - Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (distance a). **058**
 - Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (distance b). **291**
 - The resulting four figure number is the Northing. **2916**
 - The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. **TQ 0582916**
- For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.

REFERENCE

For fuller information see Reference Card published separately.

NATIONAL GRID REFERENCE

The lines on the plan form part of the National Grid and are spaced at 100 metre intervals.

To give a large scale reference defining the position of a point to the nearest 10 metres proceed as follows:-

EXAMPLE: No 49 POPE LANE

EASTING		NORTHING	
Take west edge of square in which point lies and read the figures opposite this line on NORTH and SOUTH margins		Take south edge of square in which point lies and read the figures opposite this line on EAST and WEST margins	
573		312	
2		1	
5732		3121	
TEN METRE REFERENCE:		SD 57323121	

For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System"
The representation on this plan of a road, track or footpath is no evidence of the existence of a right of way.
1 square inch on this plan represents 249 of an acre on the ground.
The alignment of tunnels where shown is approximate.

PLAN SD 5731 SW

G14/7

- Antiquities** (Site of)
- Change of boundary mering**
- Levelling Information**
Altitudes of Bench Marks and Surface Levels are given in feet above the Newlyn Datum.
Bench Mark lists, containing fuller and possibly later levelling information, are obtainable from the Director General, Ordnance Survey.
