NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows: 1. Take the two letters preceding the sheet number... TQ. 2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin... 058. 3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin... 291. 4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing... TQ 0582916.

NATIONAL GRID REFERENCE

The lines on the plan form part of the National Grid and are spaced at 100 metre intervals.
To give a large scale reference defining the position of a point to the nearest 10 metres proceed as follows:-

EXAMPLE: K in Knot House	
EASTING	NORTHING
Take west edge of square in which point lies and read the figures opposite this line on NORTH and SOUTH margins	Take south edge of square in which point lies and read the figures opposite this line on EAST and WEST margins
563	282
6	0
5636	2820
TEN METRE REFERENCE: SD 56362820	

For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System".
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
1 square inch on this plan represents 249 of an acre on the ground.
The alignment of tunnels where shown is approximate.
