#### 1. Introduction

This report examines three key areas:

- Housing completions in Preston, both on a rolling three year monitoring period (for the purposes of the Government's Housing Delivery Test) and backdated to 2003 (for the purposes of monitoring against the Development Plan housing requirement).
- Monitoring of the impact of planning policies on density, previously developed land and affordable housing.
- Future supply of housing and specifically the five year housing land supply, measured against the local housing need figure (calculated using the standard methodology as set out in national policy) and the Development Plan housing requirement figure.

Please note, due to the different ways of reporting completion statistics i.e. gross/net/site size thresholds, the annual completion figures included in Section's 2.2 and 2.3 will not reconcile with the annual completion figures in Section 2.1.

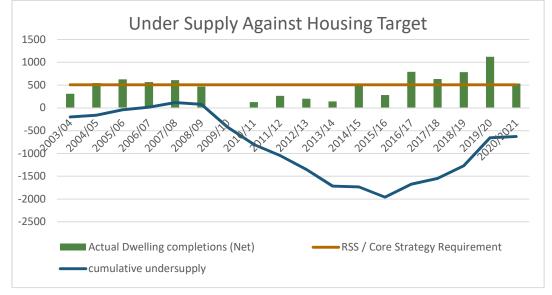

This report updates the October 2020 Housing Land Position Statement and therefore accounts for delivery and supply changes over a six month period. The 1 April – 31 March cycle represents the normal monitoring interval in Preston, however in 2020 a normal monitoring interval could not be achieved due to the Covid-19 pandemic and the cessation of site visits on health and safety grounds and to abide by national restrictions. As a result housing delivery since April 2019 is shown as those completions which occurred over the 18 month period 1 April 2019 – 30 September 2020 and those completions which occurred over the 6 month period 1 October 2020 – 31 March 2021.

#### 2. Annual Completions 2003 – 2021

Monitoring Period	Net Completions	Cumulative Over/Under Supply
April 2003 - March 2004	308	-199
April 2004 - March 2005	544	-162
April 2005 - March 2006	627	-42
April 2006 - March 2007	565	16
April 2007 - March 2008	609	118
April 2008 - March 2009	468	79
April 2009 - March 2010	5	-423
April 2010 - March 2011	127	-803
April 2011 - March 2012	265	-1,045
April 2012 - March 2013	202	-1,350
April 2013 - March 2014	142	-1,715
April 2014 - March 2015	488	-1,734
April 2015 - March 2016	282	-1,959
April 2016 - March 2017	791	-1,675
April 2017 - March 2018	634	-1,548
April 2018 - March 2019	785	-1,270
April 2019 - September 2020	1,121	
October 2020 - March 2021	535	-028
Total Net completions April 2003 - March 2021	8,498	

#### 2.1 <u>Annual Completions 2003 – 2021 (cumulative, shown graphically)</u>

The graph below shows annual completions since 2003 along with the (now revoked) RSS requirement to 2010, and Core Strategy requirement from 2010, totalling 9,126 net dwellings. The cumulative undersupply is also shown on the graph, at the end of the period the total undersupply equates to **628** net dwellings.

Monitoring period	Net completions	HDT score if available
April 2018 - March 2019	785	313%
April 2019 - March 2020	747 <sup>1</sup>	339%
April 2020 - March 2021	909 <sup>2</sup>	
Total	2,441	

#### 2.2 Annual Completion across the rolling 3 year monitoring period

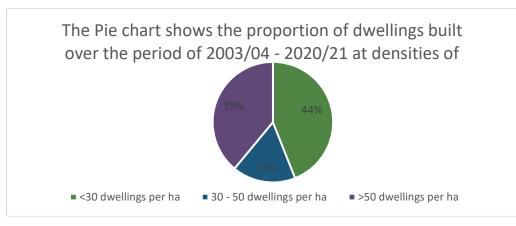

<sup>&</sup>lt;sup>1</sup> Due to the pandemic site visits could not be carried out in April 2020. At October 2020 an 18 month monitoring figure was calculated to be 1,121 completions between April 2019 – Oct 2020. This figure was used to give a pro-rata completion figure of 747 for the period April 2019 – March 2020 for the purposes of Government statistical returns.

<sup>&</sup>lt;sup>2</sup> Due to the pandemic site visits could not be carried out in April 2020. At October 2020 an 18 month monitoring figure was calculated to be 1,121 completions between April 2019 – Oct 2020. This figure was used to give a pro-rata figure of 374 completions April 2020 – October 2020. The pro-rata figure of 374 then added to 535 completions reported on site October 2020 – March 2021 from site visits = 909 completions April 2020 – March 2021, for the purposes of Government statistical returns.

#### 2.4 <u>Completions by Density</u>

## livery Commentary for 5 year supply

/H have indicated an expected delivery e of 30-50 homes on site annually. They pect to have completed this scheme hin the 5 year period around 2025. The uncil has taken a cautious approach and y assumed 30 dpa completion rate, at lowest end of DWH expectations. e site has reserved matters consent for homes and was under construction at beginning of the monitoring iod. The Council has contacted the veloper for input on build out sumptions used; however, a response not yet been received. Given there are y 18 homes still to be delivered it is sumed the site will be completed within next 2 years as there are no known riers to delivery. bry Homes have provided an expected ivery schedule for the site with the site pected to be built out by the end of 24/2025. Story Homes have however hlighted potential barriers to delivery luding material shortages and skilled our shortages. The Council has

refore taken a more cautious annual ivery rate (of 25 dpa) to that suggested Story Homes. Housing Land Position At 31<sup>st</sup> March 2021

Housing Land Position At 31<sup>st</sup> March 2021

	Sites 5-9 units	267	267		53	53	53	54	54	
	Sites under 5 units minus 10% discount	248	248		50	50	50	50	48	
<u> </u>		TOTALS	9966		847	830	841	784	773	5,891

2021/22 – 2025/26 potential supply = 847 + 830 + 841 + 784 + 773 = **4,075** 

#### 3.2 <u>5 Year Supply Position:</u>

The table at Section 3.1 identifies the potential for **4,075** units to be delivered during the five year period April 2021 to April 2026.

#### Relevant Housing Land 'Requirement' Figure

In July 2018 the revised Framework was first published, with a subsequent updated version published in February 2019. The Framework, along with revised Planning Practice Guidance, introduced the standard methodology as a mechanism to calculate local housing need. Paragraph 60 of the Framework states that strategic policies should be informed by a local housing need assessment conducted using the standard methodology unless exceptional circumstances justify an alternative approach.

Paragraph 73 of the Framework states that local planning authorities should identify a supply of specific deliverable sites to provide five years' worth of housing against their housing requirements set out in adopted strategic policies, such as Policy 4, or against local housing need where the strategic policies are more than five years old (unless the strategic policies have been reviewed and found not to require updating) with an additional buffer of 5% to ensure choice and competition in the market for land.

Policy 4 of the Core Strategy seeks to deliver a total of 22,158 new dwellings across the three Central Lancashire districts during the plan period of 2010-2026, which sets a requirement of 507 dwellings per annum for Preston. In January 2020 the Council stopped using the Core Strategy housing requirement to assess its housing land supply. This was following continued monitoring of the situation in the period of time following publication of the revised Framework in 2018 and 2019 and the significant change in circumstances which was introduced by national policy at the time, rendering Policy 4 out of date. In addition this approach also aligned with a subsequent decision by the Planning Inspectorate for a site in Chorley, Pear Tree Lane<sup>9</sup>, where Policy 4 also applies in the same way as it does in Preston.

At April 2021 the local housing need figure for Preston, calculated using the standard methodology, is **254 dwellings per annum**.

On 9 March 2021 the Planning Inspectorate issued its decision in relation to an outline planning application proposing 151no. dwellings at Cardwell Farm<sup>10</sup>, Barton. The Inspector allowed the appeal and in doing so determined that Policy 4 had been reviewed in 2017 (through a Central Lancashire Memorandum of Understanding) and should be considered as up to date.

The Council considers in making his decision, the Inspector failed to deal with material considerations which were raised by the Council during the Public Inquiry and which were of considerable importance to the Council's case.

<sup>&</sup>lt;sup>9</sup> APP/D2320/W/20/3247136, Land at Pear Tree Lane, Euxton, Chorley

<sup>&</sup>lt;sup>10</sup> APP/N2345/W/20/3258889, Land at Cardwell Farm, Garstang Road, Barton, Preston, PR3 5DR

Namely that the introduction of the standard method for calculating housing need represented a significant change in circumstances since the 2017 review of the housing requirements in Policy 4 of the Central Lancashire Core Strategy. Consequently the Council has decided to challenge the decision in the Planning Court.

That said, the Inspector's decision is lawful until it is set aside. Furthermore, at a recent conjoined Public Inquiry concerning seven appeals relating to sites at Goosnargh and Longridge<sup>11</sup>, the appellants' position was that the Council should adhere to the Inspector's findings at Cardwell Farm and use the Policy 4 housing requirement figure to assess five year housing land supply. The Council awaits the decisions on these appeals.

Given these differing views the Council accepts that currently the most reasonable approach to monitoring housing land supply should be to provide information relating to the five year supply position against both the forward looking local housing need figure (254 dwellings per annum at April 2021), and the Policy 4 housing requirement of **507 dwellings per annum** from 2003 onwards.

In accordance with Paragraph 73 of the Framework, in both scenarios, a 5% buffer has been applied to the five year housing 'requirement'.

In the October 2020 Housing Land Position Statement the Council also applied a 5% reduction to the deliverable housing land supply as a precautionary measure to allow for any reduction in housing delivery which may have resulted from the Covid-19 pandemic and the closure of construction sites during the Spring and Summer of 2020. This was especially important because the most recent update to the Housing Land Position Statement prior to October 2020 was in April 2019, therefore the Council could not be certain what proportion of the completions reported in October 2020 preceded the onset of the Covid-19 pandemic.

The current situation is materially different as the Council now knows that the completions reported at April 2021 have occurred since October 2020. Given the continued high delivery in Preston there is no justification to continue to apply the 5% reduction to the deliverable housing land supply as it is clear that there is no evidence of an interruption to recent high delivery rates either resulting from the Covid-19 pandemic or any other reason.
