

Appeal Decision

Inquiry opened on 17 April 2018

Site visits made on 3, 14 & 15 May 2018

by Richard Clegg BA(Hons) DMS MRTPI

an Inspector appointed by the Secretary of State for Housing, Communities and Local Government

Decision date: 4th February 2019

Appeal Ref: APP/M2325/W/17/3181216

Land west of The Brooklands, Wrea Green, PR4 2NQ

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a failure to give notice within the prescribed period of a decision on an application for outline planning permission.
 - The appeal is made by Gilletts Holdings Ltd against Fylde Borough Council.
 - The application Ref 17/0146, is dated 20 February 2017.
 - The development proposed is 48 dwellings with associated landscaping and open space.
 - The inquiry sat for 12 days: 17-20 & 24-27 April and 1-4 May 2018.
-

Decision

1. The appeal is dismissed.

Procedural matters

2. This appeal is one of four concerned with proposed residential development at Wrea Green, each of which was considered at the same inquiry. The four appeals are:

A	3179277	Land to the south-east of Moss Side Lane	Approximately 50 dwellings
B	3179809	Land west of Bryning Lane	41 dwellings
C	3176410	Land adjacent 53 Bryning Lane	20 dwellings
D	3181216	Land west of The Brooklands	48 dwellings

3. A pre-inquiry meeting was held to discuss procedural and administrative arrangements relating to the inquiry. At that meeting, it was agreed that the Appellants would present a joint case in respect of sustainability in relation to Wrea Green and planning policy, common highway matters (the effect on the junction of Lytham Road and Church Road, Warton), and housing land supply. Evidence from the Borough Council and other parties on these topics also addressed all four appeals. Accordingly each of my decisions includes common sections covering those topics. Other topics were addressed separately at the

- inquiry in respect of the individual appeals. A common set of core documents (CDs) was prepared for the inquiry. Similarly the lists of inquiry appearances and documents are common to each of the four decisions.
4. The application form gives the location of the appeal site as land to the west of The Brooklands, Ribby-with-Wrea. At the pre-inquiry meeting it was agreed that the location should refer to Wrea Green, and I have identified the site accordingly in the appeal details above. Appeal D was submitted in outline form, with approval sought for access at this stage.
 5. The red edge which shows the extent of the appeal site follows slightly different lines at the end of The Brooklands on the location plan and the access plans, and it emerged at the inquiry that neither was in precisely the correct position at this point. A set of amended plans (Documents APPD4a-e) was submitted which show the red edge in the correct place, omitting a small area of highway shown within the site on the previous access plans. No change is involved to the proposal itself, and I am satisfied that no prejudice would be caused to any party by the revised plans. Accordingly I have taken them into account in my consideration of this appeal.
 6. A unilateral undertaking was submitted at the inquiry in relation to appeal D (Document APPD7). It makes provision for affordable housing, and for financial contributions towards highway works in Wrea Green and Warton, and towards public realm improvements.
 7. In July 2018, after the inquiry had closed, the Government published the revised National Planning Policy Framework (NPPF). Subsequently the Government published new and updated chapters to Planning Practice Guidance (PPG) and the Office for National Statistics published the 2016-based household projections in September, and in October the Borough Council adopted the Fylde Local Plan to 2032 (the Local Plan). Accordingly the Appellants for each of the four appeals, the Borough Council, the Community Association for the Protection of Wrea Green (CAPOW), Ribby-with-Wrea Parish Council and Bryning-with-Warton Parish Council were given the opportunity to comment on the implications of these documents for their respective cases.

Main Issues

8. In its statement of case, the Borough Council expressed concern about the scale of development in Wrea Green, the impact on the junction of Lytham Road (the A584) and Church Road in Warton and on the capacity of Bryning Lane, which runs south from Wrea Green and becomes Church Road in Warton, and landscape impact. Subsequently, in the highways statements of common ground in respect of appeal D and Lytham Road/Church Road, Warton (CDs11.11 & 11.3), it was agreed that there were no highway objections to the proposal. However objections on highway grounds remain from local representatives, CAPOW, and local residents.
9. Accordingly, I consider that the main issues in this appeal are:
 - (i) Whether Wrea Green is a sustainable location for the scale of development proposed.
 - (ii) The effect of the proposed development on the character and appearance of the area.

- (iii) The effect of the proposed development on traffic movement and highway safety.
- (iv) The extent of housing land supply in Fylde.

Planning policies

10. The Development Plan includes the *Fylde Local Plan to 2032*¹, which was adopted in October last year. The following policies of the Local Plan are of most relevance in this appeal.
11. Policy S1 sets out a settlement hierarchy in which Wrea Green is included in the third level: Tier 1 – Larger Rural Settlements. Within the rural areas, development is to be restricted to the larger and smaller rural settlements, except where allowed by policies concerning the Green Belt, areas of separation, and the countryside.
12. Under Policy DLF1, most new residential and employment development, including 90% of new homes, is intended to take place at four strategic locations. The non-strategic locations comprise the local service centre of Freckleton, and the Tier 1 and Tier 2 rural settlements: here 10% of new homes are expected to be located. Policy SL5 identifies development sites outside the strategic locations: six sites at Wrea Green with a combined capacity of 246 dwellings are listed. None of the four appeal site is included in this list. Policy GD1 provides for settlement boundaries: the main part of the appeal site is outside the settlement boundary for Wrea Green, and in a countryside area as shown on the policies map². Development opportunities in the countryside are set out in Policy GD4, and none of the categories listed covers the appeal proposal. Policy GD7 seeks to achieve good design in development: amongst other requirements proposals should conserve and enhance the historic environment, be sympathetic to surrounding uses and occupiers, avoid demonstrable harm to visual amenity, make a positive contribution to the character and local distinctiveness of the area, protect existing landscape features, and not prejudice highway safety and the efficient and convenient movement of highway users.
13. Policy H1 is concerned with housing delivery, and sets an annual minimum requirement of 415 additional dwellings for the plan period of 2011-2032. Part c of the policy specifies that calculations concerning the five years supply of housing land are to be undertaken using the Liverpool method. Policy H2 seeks a minimum net density of 30 dwellings per hectare (dph), and that proposals should provide a broad mix of homes, including accommodation for the elderly. All market housing schemes of 10 or more dwellings are required to provide affordable housing/ starter homes at a level of 30% unless viability testing demonstrates that this provision would prevent delivery of the development (Policy H4). In most cases affordable housing should be provided on-site.
14. Policy ENV1 requires that development has regard to its visual impact within its landscape context, and landscape features should be conserved and wherever possible enhanced. Policy INF2 specifies that, subject to viability, development will normally be expected to contribute towards the mitigation of its impact on

¹ Document LPA13, Appendix B.

² The appeal site includes a small piece of land at the head of The Brooklands which is within the settlement boundary. This land would form part of the site access.

infrastructure, services and the environment. A series of measures to enhance sustainable transport choice are set out in Policy T4.

15. In 2012, the Parish of Ribby-with-Wrea, which includes Wrea Green, was designated as a neighbourhood plan area. However the statement of common ground on planning policy and sustainability explains that no substantial work has been undertaken on the preparation of a plan.

Reasons

Sustainability of Wrea Green for the scale of development proposed

16. Wrea Green lies in the countryside, about 2km south-west of Kirkham, 3.6km to the north of Warton, and 6.9km north-east of Lytham, all of which are larger settlements. It is predominantly residential in nature, but also includes a small industrial estate adjacent to the railway. A number of facilities and services are located in Wrea Green, including a primary school, a convenience store, and a public house. About 1.5km to the east is the Ribby Hall holiday and leisure complex where certain leisure facilities, food and drink outlets, and a convenience store are open to the wider public.

17. The development strategy of the recently adopted Local Plan explains that most development is expected to take place at four strategic locations, but, under Policy SL5, it also provides for development to take place elsewhere, including at Wrea Green. Wrea Green is identified as a larger rural settlement, in the third level of the hierarchy, and the settlement boundary is more extensive than the limits of development of the former Local Plan³, including several sites which have come forward for housing in recent years. However the land on the appeal site where residential development is proposed has not been included. It is part of a countryside area, and the proposal for housing would conflict with Policy GD4 which provides for a limited range of development opportunities in such locations. The strategy which underpins the Local Plan provides some opportunities for proposals in local service centres and rural settlements, but the focus for new development is on the key service centres and the strategic locations for development. That approach is consistent with the NPPF, which at paragraph 103 makes clear that significant development should be focussed on locations which are, or can be made, sustainable. The Local Plan envisages around 100-150 dwellings coming forward in larger rural settlements over the 21 years of the plan period⁴. In Wrea Green 253 dwellings have already come forward since 2011⁵, well in excess of the number anticipated in the Local Plan. Whilst there is no ceiling on the number of dwellings which could be built at the settlement, it is clear that it is expected to reflect the position of Wrea Green in the development strategy.

18. The number of additional dwellings for tier 1 rural settlements referred to in the Local Plan is not an indication of their capacity for development. In response to my question, the Borough Council's policy witness explained that the number is derived from the distribution of the 10% of new homes intended to come forward outside the strategic locations (above, para 12). The four strategic locations where development is intended to be focussed include key

³ The proposals map for the Fylde Borough Local Plan (as altered) is at Document G4.

⁴ Justification to Policy SL5, para 6.21.

⁵ The table on page 11 of CD20.2 lists residential commitments at Wrea Green since 2011. The slightly lower figure of 246 dwellings in the table on page 3 of CD11.1 excludes sites accommodating fewer than five dwellings.

service centres and local service centres. In the Local Plan, the justification to Policy S1 explains that key service centres include a range of housing and employment opportunities, together with facilities and services which serve a wide area, and good public transport links or the potential to develop such links. Local service centres are recognised as providing services for nearby rural settlements, and also as being well placed to provide for future local housing and employment needs. Focusing most new development in the strategic locations is consistent with the economic, social and environmental dimensions of sustainable development, as referred to in paragraph 8 of the NPPF. Accordingly only a limited level of development is distributed between the non-strategic locations identified in the Local Plan.

19. Policy DLF1 refers to the broad distribution of development, seeking to direct around 7,845 homes (90%) to strategic locations and around 870 homes (10%) to non-strategic locations. This form of words allows a degree of flexibility, as advocated by the Local Plan Inspector⁶. I note also that in the Local Plan's performance monitoring framework, indicator 4 has a trigger for action when the number of dwellings in non-strategic locations exceeds 15%. The Appellants have calculated that the total of about 159 dwellings from the four appeals would represent 1.8% of the overall minimum housing requirement, and result in 11.6% of housing occurring in non-strategic locations⁷. More significantly, they would also represent 18.3% of the level of development intended for non-strategic locations, with the number of dwellings in appeal D itself representing 5.5%. The sites outside the strategic locations, identified in Policy SL5 (and including land in Wrea Green), have a combined capacity of 933 dwellings, which slightly exceeds the 10% level and thereby already applies a degree of flexibility to the 90%/ 10% split in respect of the location of residential development.
20. The number of dwellings already committed in Wrea Green since 2011 markedly exceeds the indicative range for tier 1 settlements in the Local Plan (above, para 17). The appeal proposal would add 48 dwellings, and if all of the appeals before me were allowed, about 159 additional dwellings would be provided. Those figures would result in the total number of new dwellings exceeding the upper end of the range by about 100% and 175% respectively. These amounts of development are more suited to a higher level than a tier 1 rural settlement.
21. I have considered the availability of facilities and services for Wrea Green and the likely implications in terms of travelling. Facilities and services are identified in the statement of common ground on planning policy and sustainability (CD11.1) and the Settlement Hierarchy Background Paper (CD3.12) assesses the relative availability of facilities and services as part of the preparation of a settlement hierarchy for the Local Plan. There are several key services in Wrea Green, including a convenience shop, a post office (within the shop), a primary school, and a community facility.
22. There was particular discussion at the inquiry concerning the school and the shop. It is common ground between the main parties that the primary school is within walking distance of each of the appeal sites. The school is full, with the number on roll (152) slightly exceeding the capacity for 150 pupils⁸.

⁶ Document LPA13, Appendix D para 40.

⁷ Document APPJ14 para 3.25.

⁸ CD20.2, table on pages 52 & 53.

However Lancashire County Council, as the Local Education Authority, does not seek a financial contribution towards additional places, since one of the existing schools taken into account in the surrounding area is projected to have a surplus of 95 places within the next five years⁹. This school is at Warton, and is over 3km from the appeal site. Having regard to the admission arrangements for the school in Wrea Green and place of residence of pupils, the Appellants argue that the appeal proposals need not lead to children of primary school age travelling to another settlement. A statement entitled *School Information* on the School's website explains that about half of the 156 pupils are from beyond the local community, including Warton, Kirkham, Blackpool, Preston and Lytham (Document APPJ2). The School's Admission Arrangements give priority to children whose parents live within the ecclesiastical parish of Ribby-cum-Wrea (which includes Wrea Green and the surrounding countryside) over those whose parents live outside the parish¹⁰. It is suggested that children from the appeal sites, and existing housing commitments in Wrea Green, would displace children from further afield.

23. The information referred to by the Appellants is not sufficiently robust to enable any great reliance to be placed on this suggestion. I note that the number of children of primary school age recorded in Ribby-with-Wrea Ward in the 2011 Census¹¹ appears broadly consistent with the reference on the school website to the proportion of pupils from the local community. However the census ward is less extensive than the ecclesiastical parish and may, therefore, not fully reflect the number of local pupils. More fundamentally, the website statement is undated and simply gives the position at a point in time. It is not clear how recent the statement is, nor whether the proportion of pupils from beyond the local community reflects a continuing situation. Eleven primary school age children are expected to be generated by appeal D, and a further 32 by the other three proposals¹². Wrea Green school is fully subscribed, and I do not consider that the information before me indicates that there would be scope for all the additional children from the appeal proposals to be accommodated there in place of children from beyond the ecclesiastical parish. I anticipate that the appeal proposal would result in trips being made to primary schools outside Wrea Green.
24. The shop in Wrea Green sells a range of food and other convenience items and also accommodates the post office. As the Borough Council points out, the site is constrained, and there is no clear opportunity to expand the premises. As a small convenience store, I expect that the shop provides a top-up service and that it does not account for main shopping trips. Indeed, I note that the Settlement Hierarchy Background Paper assesses local stores in rural settlements and accessibility to supermarkets separately. There is no substantive evidence that the role of the existing shop as a convenience outlet would be adversely affected by additional housing, but more shopping trips for other purposes would inevitably be made outside the settlement.
25. Certain additional facilities and services are available at Ribby Hall holiday and leisure complex. As a convenience store, food and drink outlets, and pre-school are present in Wrea Green, these facilities do not extend the variety of

⁹ The LEA's assessment is in the email at CD18.6.

¹⁰ The Admission Arrangements for 2019 and a map of the ecclesiastical parish are Documents APPJ2 and G9 respectively.

¹¹ CD16.9 – Ribby-with-Wrea 2011 Census Ward – Local Area Report, page 4 - table on age structure.

¹² CD20.2, table in para 13.57.

- provision. A swimming pool, health club and gym are the principal facilities at Ribby Hall which would augment those in the settlement itself. Ribby Hall is physically separate from Wrea Green. Whilst the facilities there are within cycling distance of the appeal site, they are beyond the preferred maximum walking distance of 1.2km for purposes other than town centres, commuting, school and sight-seeing, set out in the Guidelines for Providing for Journeys on Foot¹³. Moreover, outside the settlement, a large part of the route along Ribby Road is not overlooked. Particularly outside the hours of daylight, the nature of this route is unlikely to encourage trips on foot.
26. There is a small industrial estate at Wrea Green, and there are other employment opportunities available at Ribby Hall. I agree with the main parties that most journeys to work for existing and future residents will involve travelling outside the settlement. Journeys by future residents out of Wrea Green would also be required for secondary education, shopping (other than local convenience requirements), and to access a wider range of services.
27. The nearby settlements of Kirkham, Wesham and Warton are within cycling distance of Wrea Green. Kirkham is a key service centre, and both Wesham and Warton are local service centres. There are employment opportunities at these settlements, including the major BAE Systems works at Warton, and access to the rail network is available from Kirkham & Wesham station.
28. There are two main bus routes which serve Wrea Green. The No 61 runs every 30 minutes between Blackpool and Preston on weekdays and Saturdays, with the frequency reducing to hourly in the evenings and on Sundays. This service also calls at Kirkham centre and Kirkham & Wesham rail station. The No 76 operates on a two hourly frequency between Poulton and Lytham, calling at Warton, with some journeys extending to Blackpool¹⁴.
29. Given the limited range of facilities, services and employment opportunities in Wrea Green, I anticipate that many trips made by future residents of the appeal site would be to destinations beyond the settlement. It is clear that opportunities exist to travel by bus to larger settlements from Wrea Green, but the Appellant's transport statement indicates that a significant proportion of journeys would be made by car. It envisages that the 48 dwellings proposed would generate 28 vehicle trips in the morning peak period and 32 vehicle trips in the afternoon peak¹⁵.
30. The Settlement Hierarchy Background Paper only takes account of one of the two bus services which now serve Wrea Green. If the No 61 is included in the assessment, the additional two points would place Wrea Green level with Freckleton, which is a local service centre. The outcome of the background paper is a relative ranking of settlements, and it would be inappropriate to review bus services in respect of just one of the 19 settlements assessed. In any event, the presence of a cluster of shops, a surgery, and a library all indicate that Freckleton is a higher order settlement than Wrea Green. I have also considered the position of Wrea Green relative to Warton. Warton has a lower aggregate score than Wrea Green, but it is identified as a local service centre in the Local Plan. That is because Warton, which is a strategic location, is intended to have improved services as a consequence of the development

¹³ CD10.3, table 3.2.

¹⁴ Timetables for the 61 and 76 bus services are in Document APPJ1.

¹⁵ CD11.9, table in para 3.4.

strategy. The first recommendation of the background paper refers to the need for further investment in Warton during the plan period to ensure that the settlement becomes a local service centre through the provision of a local retail centre and community facilities. The circumstances at both Freckleton and Warton differ from Wrea Green, and do not suggest that the latter settlement should receive a higher level of development than would be appropriate at the third level of the settlement hierarchy.

31. I find that, with a limited range of facilities and services, Wrea Green functions as a tier 1 rural settlement. Whilst the number of dwellings referred to in the ELP does not indicate a capacity limit for new development, and has already been exceeded in Wrea Green, the continued addition of significant housing proposals would be contrary to the Local Plan development strategy which seeks to focus development in higher order settlements and strategic locations. Such an approach, as part of the Development Plan, carries considerable weight. There are certain facilities and services, which may generally continue to operate effectively, although the position concerning the school is less clear-cut (above, para 23). They are however limited in extent, as are employment opportunities. In consequence, the proposed housing is likely to generate trips to destinations beyond Wrea Green, and bearing in mind the projections in the transport statement, it is likely that a significant proportion of these would be made by non-sustainable modes of transport. I conclude that the appeal site would not be a sustainable location for the housing development proposed, which would conflict with Policies DLF1, S1, GD1 & GD4 of the Local Plan.

Character and appearance

32. Wrea Green has grown around The Green which is the focal point of the settlement. The appeal site is situated a short distance to the west of The Green on the edge of the built-up area where it extends between Wrea Brook to the north and Mill Lane to the south.
33. In the *Landscape Character Assessment (LCA) of A Landscape Strategy for Lancashire* (CD16.4), the countryside around Wrea Green is included within The Fylde character area of the coastal plain. The LCA explains that the coastal plain is characterised by gently undulating or flat lowland farmland divided by low clipped hedges. Woodland cover is generally low, but views are punctuated by small woods, and settlement is relatively dense. Although unused the site is characteristic of the landscape in this part of The Fylde. It comprises two fields which fall gently towards the watercourse. A small copse of trees has become established in the north-east corner of the site. Boundary hedgerows have not been maintained, and there is a pond on the internal boundary between the fields. Whilst the site contains certain features which are typical of The Fylde, none are rare locally or important examples of their type. There are no rights of way across the land and it is not formally available for recreation purposes. Having regard also to the urban influence of the built-up area and the nearby railway line, I consider that the landscape of the site is of low sensitivity.
34. The second report of *A Landscape Strategy for Lancashire*, the *Landscape Strategy* itself (CD16.5), considers the implications of local forces for change. Amongst other factors, it refers to continued suburbanisation and large scale residential development which would create harsh edges to villages and introduce urbanising elements into the rural landscape of The Fylde. In this case the masterplan (CD9.2) indicates that the dwellings proposed on the

southern part of the site would be bungalows and set back from Mill Lane where the hedgerow would be retained. The greater part of the internal hedgerow would also be retained, together with the pond. Although residential development would inevitably alter the character of the site, the masterplan indicates that this could occur within the framework provided by existing features. I consider that the harm to the landscape of the site merits limited weight.

35. To the west of the site is a strip of land, about 20m wide, in the Appellant's control. Trees have been planted here, providing a break with the fields beyond, and the Appellant had no objection to a condition to ensure their retention. There is the opportunity to reinforce this effect through further tree planting within the site itself. The site abuts the built-up area and containment is also provided by the line of the railway, a short distance to the north, and the loose-knit development and mature tree cover to the south along Mill Lane. The 48 dwellings proposed would consolidate the urban form on this side of Wrea Green, but their presence on the appeal site would cause only limited harm to the landscape of the area. There is a gradual transition to the built-up area from the eastern end of footpath 1 and along Mill Lane, with loose-knit development opposite the fields at the appeal site outside the limits to development. Although the two fields would be lost, the set back of the proposed dwellings from Mill Lane, and the retention of frontage hedgerow, would avoid a material change to the nature of this entrance to the built-up area. Given its relationship to Wrea Green and existing physical features, the loss of this block of open land would cause only minor harm to the landscape character area of The Fylde.
36. To the south of the site and set back from Mill Lane is Wrea Green windmill. The building no longer has sails, and is not on a list of local heritage assets, but is nevertheless a distinctive feature of the locality. Whilst it can be seen on the skyline from Ballam Road and public footpath 6 (Appellant's viewpoints 13-16 (VPs13-16), Council's viewpoints 16.1 & 16.2), it is not particularly prominent in these views due to the combination of distance and tree cover south of the railway. As the appeal site slopes down from Mill Lane to the north and it is intended that those dwellings closest to the road would be bungalows (which could be secured by condition), the windmill would remain visible on the skyline. The windmill is more clearly visible from the junction of Mill Lane with Dubsidge in the centre of the settlement, from Mill Lane to the south of the site, and from Moss Side Lane at the access to The Villa hotel. The presence of housing on the appeal site should not interfere with these views.
37. Nor would the proposed housing itself be prominent in views from the north. The backcloth of mature tree cover along Mill Lane would assist in assimilating the development into its surroundings. Moreover the direction of travel along both Ballam Road and footpath 6 does not afford direct views towards the appeal site. To the west footpath 1 approaches the site joining Mill Lane by the south-west corner of the site. Views of housing on site D on this approach to Wrea Green would be significantly restricted by the hedgerows alongside the footpath and the belt of tree cover alongside the site. The impact of built development on this open land merits limited weight.
38. There are a number of dwellings in the built-up area to the east and on Mill Lane from where the site can be seen. Whilst the outlook across the appeal site from nearby dwellings would be greatly changed by the proposed development,

these are private viewpoints generally in an edge of settlement location where other housing already forms part of their setting. Whitecroft is set apart from most other nearby dwellings, being adjacent to the south-west corner of the site. Here the tree belt on land to the rear of the house and planting within the site would lessen the impact of built development. The proposed development would cause some moderate harm to the outlook for occupiers, but I accord this only minor weight.

39. I conclude that the proposed development would have certain adverse effects on the character and appearance of the area, but neither the impact on the landscape nor on visual amenity merits more than limited weight. Nevertheless, since there would be a degree of harm, the proposal would conflict with Policies GD7(g & h) & ENV1 of the Local Plan.

Traffic movement and highway safety

Bryning Lane/ Church Road and the junction with the A584

40. Wrea Green lies at the intersection of four routes. The road to the south (Bryning Lane/ Church Road) provides a route between the M55 and locations in Blackpool and Wyre to the north and Warton to the south where there is a large BAE Systems factory. Notwithstanding the position of agreement reached in the statements of common ground concerning highway matters, there is continuing concern within the local community about the effect of the four appeal proposals on Bryning Lane/ Church Road and on the crossroads junction which it forms there with Lytham Road (the A584) and Highgate Lane (above, para 8).
41. An improvement scheme has been prepared for the crossroads junction, which is linked to three major housing developments permitted in Warton¹⁶. The measures include carriageway widening, the upgrading of traffic signal equipment and improvements in provision for pedestrians and cyclists¹⁷. The modelled forecast in the statement of common ground is that the four proposed housing developments in Wrea Green would together generate an additional 24 vehicle movements on Church Road and through the crossroads junction in the morning peak period and an additional 26 vehicle movements in the afternoon peak period¹⁸: there is no other modelled forecast of traffic movement through the junction before me. The additional traffic would increase the pressure on this busy junction, and it is agreed by the main parties that mitigation measures to address the additional impact would be required if any of the appeal proposals were permitted.
42. The unilateral undertakings in respect of each of the appeals includes provision for payment of a Warton Crossroads Contribution of £314 per dwelling to fund measures referred to in the statement of common ground. Measures envisaged include the installation of microprocessor optimal vehicle activation control, CCTV monitoring, the relocation of loops in the highway, a new signal control box, and new signal poles and heads. The Borough Council's highway witness explained at the inquiry that the extent of measures required would be contingent on the number of schemes to come forward, and the funding arrangement provides the requisite flexibility for this approach.

¹⁶ The location of the housing schemes at Blackfield End Farm, Clifton House Farm and Warton East are shown on the plan at Appendix 1 of CD11.3; a plan of the improvement scheme is at Appendix 10.

¹⁷ The components of the improvement scheme are summarised in Document G3.

¹⁸ The additional traffic movements are given in the table in paragraph 2.15 of CD11.3.

43. Bryning Lane between Warton and Wrea Green is relatively narrow, with no footways or lighting, and the route encompasses a number of dips and bends. Traffic moves freely along this road, and although CAPOW referred to an increasing number of accidents, there is no specific evidence of a poor accident record on Bryning Lane. Subject to the implementation of mitigation measures commensurate with the number of dwellings to come forward in Wrea Green I do not consider that the appeal proposal alone, or in combination with any of the other three schemes would reduce highway safety or adversely impact on traffic movement on Bryning Lane/ Church Road and at Warton crossroads.

The Brooklands and Wrea Green.

44. CAPOW and a local resident have expressed concern about the suitability of The Brooklands as the means of access to the site. It is referred to as being relatively narrow and attention is drawn to the pronounced bend towards the eastern end of the road, and parking at the junction with Dubside. Traffic calming measures are proposed along The Brooklands in the form of two junction tables, and the kerb build-out at the point of access into the site should also contribute to ensuring that vehicles travel at lower speed appropriate for a residential road. Conditions are suggested to secure the implementation of these works.

45. There are repeated references in representations from the local community to the 20mph speed limit in Wrea Green being disregarded. This evidence is not disputed by the main parties and traffic calming measures are included in a package of transport works for Wrea Green. The extent of these physical works should ensure that traffic speed is reduced, and that the speed limit of 20mph is generally observed. Construction of a table at the junction of The Brooklands and Dubside should also reduce the likelihood of parking occurring at this point on the highway. The traffic calming measures should assist in maintaining highway safety. It follows that I find that the contribution of £60,377 towards the cost of the Wrea Green transport works is a necessary component of the unilateral undertaking.

46. An occupier of one of the houses at the end of The Brooklands contends that construction of the access proposed would prevent parking outside his property. I acknowledge that the kerb build-out would prevent parking immediately outside both end houses. However these properties have space for parking within their curtilages, and there would be the opportunity for on-street parking close by, if required.

47. I conclude that the proposed development would not adversely affect traffic movement and highway safety within Wrea Green or on the wider highway network. In this respect there would be no conflict with Policy GD7(q) of the Local Plan or paragraph 109 of the NPPF.

Housing land supply

48. There is disagreement between the four Appellants and the Borough Council as to whether there is a five years supply of housing land in Fylde. It is the Borough Council's position that following the adoption of the Local Plan there is a deliverable supply as required by paragraph 73 of the NPPF. For their part, the Appellants point out that the Local Plan was prepared under the former version of the NPPF, and that a new housing land assessment should be undertaken in the context of the revised NPPF.

49. Paragraph 74 of the NPPF makes it clear that a five years supply of deliverable housing sites can be demonstrated where it has been established in a recently adopted plan. There can be no doubt that the Fylde Local Plan to 2032, adopted in October 2018, is a recently adopted plan. The Appellants also draw attention to paragraph 3-049 of PPG, which provides guidance on demonstrating a five years land supply. Referring to the NPPF, this part of PPG explains that if strategic policy-makers choose to confirm their five years supply under paragraph 74, they will need to indicate that they are seeking to do so at Regulation 19 stage. The Appellants point out that this step for the purposes of paragraph 74 was not undertaken as paragraph 74 post-dates the examination and previous stages of the then emerging Local Plan (ELP). That chronology is self-evident. However, the version of Policy H1 in the publication edition of the ELP states at part (c): *Ensuring that there is enough deliverable land suitable for house building capable of providing a continuous 5 year supply from the start of each annual monitoring period...* It was clearly the intention at that stage of the ELP that a five years supply of housing land would be established through the Local Plan. That intention remains in the adopted Plan.
50. It is true that the Local Plan was prepared in the context of the previous version of the NPPF. That version explained that sites with planning permission should be considered deliverable unless there was clear evidence that schemes would not be implemented within five years, and the former version of chapter 3 of PPG referred to allocated sites in the same vein. The revised NPPF takes a different approach: the definition of deliverable states that *Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.* I note that the Borough Council issued an updated housing land supply statement in August 2018¹⁹, which removed 736 dwellings from the supply in response to this change in the NPPF. The Appellants' housing land witness has adjusted this figure to reflect the base date of 30 September 2017 agreed for these appeals. He has also reviewed sites which were contested in the evidence to the inquiry, and has suggested that further discounts should be applied in recognition of the position taken by the Borough Council in another appeal in September 2018²⁰.
51. The revised housing land assessment undertaken on behalf of the Appellants applies scenarios where the shortfall would be met over the remainder of the Plan period (the Liverpool approach) and alternatively where it would be met within the five years period (the Sedgfield approach). The Local Plan Inspector concluded that the Liverpool approach is appropriate in Fylde, and this is specifically referred to in part (c) of Policy H1. On this basis, and applying a 20% buffer, a five years requirement of 2,858 dwellings is calculated, as set out in the penultimate column of table 2 of the housing supply statement of common ground (CD11.2). Application of the Appellants' discounts to the supply given in the September 2017 housing land supply statement (CD15.1) would give a reduced level of 2,477 dwellings, sufficient for 4.33 years²¹.

¹⁹ Document LPA11, Appendix A. Although published in August 2018, this document has a base date of 31 March 2018.

²⁰ Document APPJ13, paras 11.32-11.40.

²¹ Document APPJ13, table in para 11.41.

52. As the Appellants' evidence demonstrates, a variety of housing land scenarios can be calculated. However in this case there is a very recently adopted Local Plan, in relation to which the Inspector has found that there is a housing land supply of 6.4 years²², and the NPPF reaffirms that the development plan is the starting point for decision making. It is the intention that the Local Plan (Policy H1(c)) will provide enough deliverable land to maintain a five years supply since publication, and I agree with the Appellants that it is too early for an annual position statement to be prepared. For these reasons I conclude that the Borough Council is entitled to rely on paragraph 74 of the NPPF to demonstrate a five years supply of housing land through its recently adopted Local Plan. Both Policies DLF1 and H1 refer to a minimum level of provision for housing. There is no ceiling on the number of new dwellings which may come forward, and, bearing in mind paragraph 59 of the NPPF which refers to the Government's objective to significantly boost the supply of homes, the additional dwellings proposed in appeal B would represent a benefit, although one to which I attribute moderate weight only given its modest size in the context of the overall housing requirement.

Other considerations

Affordable housing

53. Addendum1 to the Fylde Coast Strategic Housing Market Assessment identifies a net annual affordable housing need of 249 dwellings in the Borough, representing a significant proportion of the overall annual need for 415 dwellings. In response, Policy H4 of the Local Plan seeks the provision of 30% affordable housing on schemes of 10 or more dwellings. An obligation in the unilateral undertaking would secure this level of provision. Whilst this is an important benefit of the proposal, it would result in 15 affordable dwellings. In view of the limited contribution to the need for affordable homes, this is a benefit to which I give moderate weight.

Drainage and flood risk

54. Network Rail has expressed the view that surface water should drain away from the railway. A short distance to the north-west of the site Wrea Brook flows adjacent to the railway embankment, and a local resident has suggested that the cumulative impact of recent residential development could pose a risk to the integrity of this structure. The appeal site slopes towards both the Wrea Brook and the railway. This is the direction in which surface water, including any overflow from the pond, will run off the site at present, discharging into the watercourse. The drainage strategy proposes to maintain runoff to Wrea Brook at greenfield rates with storage provided to site to attenuate the flow. As this proposal replicates the existing situation, there should be no detrimental effect off-site, and I note that no objection has been raised by Lancashire CC, as lead local flood authority.

55. Similarly, whilst CAPOW and local residents are concerned about the ability of the foul water system to cope with additional development, United Utilities do not object to development on this site, and there is no detailed evidence to demonstrate that the proposal would overload the existing drainage system. Conditions could require the submission of detailed schemes for approval including a requirement to restrict the run-off rate of surface water. With these

²² Document LPA13 Appendix D, para 87.

safeguards I do not consider that the proposed development would cause drainage problems or pose a risk to the integrity of the railway embankment due to surface water flows from the site.

Living conditions

56. CAPOW suggests that the movement of additional traffic along The Brooklands, in conjunction with traffic calming measures, would cause problems of noise for residents. However the presence of several traffic calming features on this short stretch of road should ensure that vehicles travel more slowly and that the speed limit of 20mph is generally observed. At this speed I do not consider that noise from vehicles travelling along The Brooklands would be likely to unacceptably worsen the living conditions of nearby residents. Accordingly I find no conflict with criterion (h) of Policy GD7 which requires development proposals to be sympathetic to surrounding land uses and occupiers.

Open space

57. The scheme would include open space, and the masterplan shows an area for this purpose adjacent to the pond. The Appellant suggests that open space within the site would be of benefit to existing residents. There is nothing before me to indicate that there is a need for additional open space to serve the existing community, and this is a matter which adds little weight to the appeal proposal.

Environmental and economic considerations

58. It is intended that the scheme would include measures to enhance biodiversity in accordance with Policy GD7 of the Local Plan. These measures also represent mitigation as the development would cause disturbance to wildlife on land which has remained unused for a considerable period of time. The Appellant refers in general terms to economic benefits, including from jobs and spending, both during the construction period and when properties would be occupied. There is no detailed evidence on this matter, and in any event these are generic considerations which would apply equally to any development of 48 dwellings in the area. Environmental and economic considerations merit little weight in support of the appeal proposal.

Public realm enhancements

59. In line with Policy INF2 of the Local Plan, the Council's Regeneration Framework (CDs19.10 & 19.11) identifies projects across the Borough for environmental improvements. The Wrea Green Project (CD19.7) includes enhanced street lighting, enhancing the area outside St Nicholas's Church, footway improvements and tree planting around The Green. The Council explains that the works for which funding has already been secured would not secure the improvements to the public realm necessary to mitigate the effect of the proposals. It has been agreed that a contribution of £1,000 per dwelling would be made to the project, including extending the improved paving scheme in the conservation area and developing the grassed area in front of the public house for community activity. The unilateral undertaking includes an obligation to this effect. As these enhancements also represent mitigation, I give them only limited weight.

The planning obligations

60. I have already considered the provisions of the planning obligations concerning contributions towards the Warton crossroads and Wrea Green highway schemes (above, paras 42 & 45), affordable housing (para 53) and public realm enhancements (para 59). These measures are consistent with local policies and their implementation would be necessary to contribute to a satisfactory standard of development. I find that the statutory tests in Regulation 122 of the Community Infrastructure Levy Regulations are met, and the provisions of the unilateral undertaking are material considerations in this appeal.

Conclusions

61. Wrea Green would not be a sustainable location for the residential development proposed, which would conflict with Policies DLF1, S1, GD1 & GD4 in the Local Plan, and this is a matter to which I give significant weight. There would be limited harm to the character and appearance of the area, but in consequence there would be conflict with Policies GD7 & ENV1. Although there would be compliance with other aspects of Policy GD7 concerning highway safety, the relationship with nearby uses and biodiversity, and the level of affordable housing sought by Policy H4 would be provided, I conclude that the proposal would be contrary to the Development Plan considered as a whole.
62. The provision of additional market housing carries moderate weight. I attach moderate weight to the affordable housing which would be brought forward by the scheme. The contribution of the scheme towards public realm enhancements in Wrea Green and public open space, together with environmental and economic considerations provide no more than limited additional weight in support of the proposal. These benefits do not outweigh the harm which I have identified, and there are no material considerations which indicate that the appeal should be determined other than in accordance with the Development Plan.
63. For the reasons given above, and having regard to all matters raised, I conclude that the appeal should be dismissed.

Richard Clegg

INSPECTOR

APPEARANCES

FOR THE LOCAL PLANNING AUTHORITY:

Mr J Easton of Counsel	Instructed by the Legal Services Department, Fylde BC.
He called	
Mr S Smith BA MSc	Blackpool Airport Enterprise Zone Delivery Manager, Blackpool Council.
Mr A Stell BA(Hons) MRTPI	Development Manager, Fylde BC.
Mr N J Stevens BEng(Hons) MSc	Highways Development Support Manager, Lancashire County Council.
Mr D Longdin BSc DipLA FLI	Partner, Randall Thorp.

FOR APPELLANT A:

Mr A Crean QC	Instructed by Colliers International.
He called	
Mr P Gray BA(Hons) BLA CMLI	Director, PGLA Landscape Architects.
Mr K G Riley BSc(Hons)	Projects Director, Mott MacDonald.
Mr A H Aitken BSc MRTPI	Head of UK Planning, Colliers International.

FOR APPELLANT B:

Mr V Fraser QC	Instructed by Mr Harris.
He called	
Mr S A Harris BSc(Hons) MRTPI	Director, Emery Planning Partnership.
Mr N I Folland BA(Hons) DipLA CMLI	Director, Barnes Walker Ltd.
Mr D Roberts IEng FIHE FCIHT	Director, SCP.

FOR APPELLANT C:

Mr M Carter of Counsel	Instructed by Mr McAteer.
He called	
Mr A McAteer DipTP DMS MRTPI	Director, McAteer Associates Ltd.
Mrs L Cruice BA DipLA TechArborA CMLI	Director, Appletons.
Mr J B Farmery MEng CEng MICE MCIHT ICE	Managing Director, Cole Easdon Consultants Ltd.
Mr R Bowley BSc CEng MCIWEM	Director, Cole Easdon Consultants Ltd.

FOR APPELLANT D:

Mr I Ponter of Counsel	Instructed by Knights 1759.
------------------------	-----------------------------

He called	
Mr W Booker BSc	Director, SCP.
Mr J Berry BA(Hons) DipLA CMLI AIEMA MArborA	Partner, Tyler Grange LLP.
Mr A Corinaldi-Knott MTCP MRTPI	Associate, Knights 1759.

INTERESTED PERSONS:

Councillor F Andrews	Member of Fylde BC for Ribby-with-Wrea Ward.
Councillor J Maskell	Chairman, Ribby with Wrea PC.
Councillor M Wright	Member of Bryning-with-Warton PC.
Mr J Rowson	Chairman, Community Association for the Protection of Wrea Green.
